

Regent
SEVEN SEAS CRUISES®
AN UNRIVALED EXPERIENCE™

Our vision is to be the vacation of choice for everyone around the world. That's why we've enhanced our commitment to your well-being while cruising with our **SailSAFE™ Health and Safety Program**. Creating what we believe is a uniquely safe and healthy vacation experience, our **SailSAFE** enhanced protocols create multiple layers of protection against COVID-19 for our guests, crew and the communities we visit. The robust, science-backed strategy, which includes operating with fully vaccinated guests and crew, was developed in conjunction with a diverse group of globally recognized experts, including the **SailSAFE™ Global Health & Wellness Council**, and is continuously evaluated using the latest science and technology.

SAFETY FOR OUR GUESTS & CREW

PRE-CRUISE VACCINATIONS, TESTING, SCREENING & CHECK-IN

ALL INDIVIDUALS (GUESTS & CREW) MUST BE VACCINATED

- ◆ All guests and crew must be fully vaccinated, at least 2 weeks prior to embarkation, in order to board. Guests will need to provide proof of vaccination as provided to them at the time of their vaccination, therefore a photograph of a vaccination card is not sufficient.
- ◆ Our protocols and requirements will evolve to follow the science to make determinations on requirements as we get closer to sailing dates.

ADDITIONAL PRE-EMBARKATION HEALTH SCREENING

- ◆ Regent strongly encourages all guests to take a COVID-19 PCR test at home, 3 to 4 days prior to traveling to the ship, as an added precaution. If a PCR test is not readily available, then we encourage guests to at a minimum take a COVID-19 Antigen test at home, prior to travel.
- ◆ All guests will undergo pre-embarkation health screening including an enhanced health questionnaire and touchless temperature check.

- ◆ For all voyages, all guests will be required to take a COVID-19 antigen test, administered and paid for by the cruise line, prior to boarding and receive a negative result.
- ◆ Should guests require assistance finding a COVID-19 testing location prior to departing home or while traveling, please visit the Test for Travel website at www.testfortravel.com. Additionally, we have partnered with Inspire Diagnostics to provide hasslefree, online testing for our guests from the convenience of your home.
- ◆ As the entry requirements by country are evolving, we recommend that all guests consult with local government websites to determine any additional requirements, including additional pre-cruise testing that may be required to travel.

SOCIALLY RESPONSIBLE CHECK-IN

- ◆ We've designed an enhanced, staggered embarkation process and new check-in system to streamline check in for guests by allowing documents to be signed electronically.
- ◆ Additionally, embarkation terminals will be disinfected continuously, and where possible, fogged before and after each embarkation and debarkation.

ONBOARD CONTROLLED GUEST CAPACITY & HAND SANITATION

REDUCED GUEST CAPACITY

- ◆ We will initially control the guest capacity on board each ship to provide even more space for responsible physical distancing.

HAND SANITATION

- ◆ All guests will be required to engage in frequent handwashing.
- ◆ Hand sanitizer will be prominently placed and easily accessible throughout the ship.

ONBOARD HEALTH MONITORING FOR GUESTS & CREW

- ◆ Temperature checks and ongoing symptom screening will be practiced throughout the cruise.

SAFETY ABOARD OUR SHIPS

ONBOARD — INCREASED SANITATION MEASURES, UPGRADED AIR FILTRATION SYSTEMS, ENHANCED MEDICAL TEAMS & FACILITIES

CONTINUOUS SHIP-WIDE CLEANING DISINFECTION MEASURES

- ◆ Comprehensive enhanced cleaning and sanitation protocols have been implemented throughout the cruise experience.
- ◆ Our 24/7 prevention schedule features continual disinfection of public areas and high-traffic touch points using EPA-approved disinfectants.
- ◆ Guest accommodations will receive intensive non-toxic microbial disinfection daily.

UPGRADED MEDICAL-GRADE AIR FILTRATION SYSTEMS

- ◆ To provide cleaner air for our guests we are strategically installing medical-grade air filters of the highest filtration grade, MERV 13 or HEPA according to the type of HVAC system installed on board.
- ◆ The upgraded H13 HEPA air filters are capable of removing 99.9% of airborne pathogens, including SARS-CoV-2 (coronavirus), the virus that causes COVID-19.
- ◆ A new air treatment technology, bio-polar ionization, has been adopted to continuously disinfect the air in occupied spaces.

ENHANCED ONBOARD MEDICAL TEAMS & HEALTH SERVICES

- ◆ We're improving our onboard medical capabilities with additional staffing relative to capacity and enhanced facilities. This includes an increase in intensive care unit capacity, new and upgraded equipment, onshore medical institution partnerships, telemedicine capabilities and additional robust consultation and treatment options.
- ◆ Onboard medical centers are abundantly stocked with common prescription medications, remedies, and virus-testing equipment.
- ◆ Complimentary consultations and treatments are provided for respiratory illnesses as well as dedicated isolation accommodations should the need arise.

DEDICATED PUBLIC HEALTH OFFICER

- ◆ Each ship will have a dedicated Public Health Officer on board. This expert is responsible for the oversight of all outbreak prevention initiatives. They will oversee the day-to-day sanitation and cleanliness of all public areas and accommodations.
- ◆ Each ship will also have an Infectious Disease Prevention Officer on board.

SAFETY ASHORE

DESTINATIONS, ITINERARIES & SHORE EXCURSIONS

STRATEGIC ITINERARY DEVELOPMENT & SHORE PARTNERS

- ◆ We constantly monitor the health environment across the globe and will modify or cancel itineraries to affected areas as needed.
- ◆ We're partnering with our local destinations and tour operators to extend our comprehensive health & safety protocols to shore.
- ◆ As the entry requirements by country are evolving, we recommend that all guests consult with local government websites to determine any additional requirements, including additional pre-cruise testing that may be required to travel.

THOROUGH & EFFECTIVE MOBILIZATION PLAN

CONTACT TRACING

- ◆ If a positive case of COVID-19 occurs, we have various contact tracing methodologies to identify and notify those who may have been exposed.

ISOLATION/QUARANTINE

- ◆ Dedicated isolation and quarantine accommodations will be available if needed.

DISEMBARKATION SCENARIOS

- ◆ We have developed a thorough mobilization and response plan focused on providing medical treatment, collaborating with local authorities and coordinating safe passage home for all guests and crew should the need arise.
- ◆ We have established relationships with onshore medical institutions and enhanced our telemedicine consultation capabilities.
