Enjoy two aspects of the natural world by observing iguanas in a protected zoo-like habitat and then visiting an eco-park that revolves around birds and butterflies. Roatan is known for its biodiversity, but few tropical animals are as iconic as the iguana, hundreds of which you will see at the Iguana Hideaway. It is an excellent venue to observe these prehistoric-looking reptiles, as iguanas are threatened on Roatan from loss of habitat and being captured for the pet trade. Watch them basking in the sun, lounging in trees and munching on vegetables. Flying creatures take center stage at the Mayan Eden Eco Park, where you will stroll through an enclosure with a huge variety of butterflies indigenous to Honduras. You can also expect to see hummingbirds flitting from blossom to blossom and brightly colored parrots. With the guide's assistance, you can probably coax one to perch on your arm for a photo.

- See hundreds of iguanas in a protected habitat shaded by tropical foliage.
- Hear about iguana behavior, and why the reptiles are endangered on Roatan.
- Walk among hundreds of fluttering butterflies in an eco-park.

The traditional Garifuna language, dance and music are so unusual that UNESCO added them to its Intangible Cultural Heritage of Humanity list.
